**DETAILED ACTION**

***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-16, drawn to an airbag door classified in Class 280, subclass 728.3.

Group 2, claim(s) 17 and 18, drawn to method of making an airbag door classified in Class 264, subclass 254.

The inventions listed as Groups 1 and 2 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature in the product claims is the structure of the door, layers and penetrating foam, etc, while the special technical feature of the method of making the door is the use of a rear foaming tool, filling the cavity by rear foaming and sealing details, etc.
